EXPERIENCE

Robotics Behaviors & User Interfaces Intern

Hydromea

Mar 2026 – Nov 2026

Renens VD

- Developed Python-based control panel features for autonomous underwater vehicles, adding operator controls and real-time feedback for wings, batteries, payloads, and onboard systems.
- Maintained and optimized embedded software (C, C++) on microcontrollers and Raspberry Pi platforms.
- Improved software quality through debugging, refactoring, and performance optimization.

Teaching-assistant

EPFL

Sep 2021 – Feb 2024

Lausanne

- Supervised exercises in nine Bachelor-level math & physics courses.
- Prepared exercise solutions and course materials.
- Typed Prof. Mila's mechanics lecture notes.

PROJECTS

Groque

- Developed a private Discord bot.
- Deployed on Fly.io.
- LLM API integration.
- Automated routines and custom commands.

HSG Entrepreneurship Hackathon 2025

Participated in the St.Gallen hackathon in collaboration with Emify.AI, from 14 to 16 May 2025.

42 School Projects

- webserv — Non-blocking C++ webserver.
- miniRT — Ray tracing, math & graphics.
- minishell — Shell interpreter, parsing & processes.
- Philosophers — Concurrency & synchronization.
- fract-ol — Fractal renderer.
- pipex — Shell pipe emulation.
- push_swap — Sorting & optimization algorithms.
- ft_printf — C printf reimplementation.
- get_next_line — File reading and memory management.
- Born2beroot — Linux server setup, security & administration.
- libft — C standard library reimplementation.

EDUCATION

Software Engineering Program

42 Lausanne

Oct 2024 — Present

Renens VD

Master's studies in Physics

EPFL

Sep 2021 — Feb 2024

Lausanne

Specialized in condensed matter theory.

Bachelor's degree in Physics

Sorbonne Université

Sep 2019 — Jun 2021

Paris 5^e

Preparatory Cycle

Polytech Annecy-Chambéry

Sep 2018 — Jun 2019

Annecy-le-Vieux
